

in the world. And we have a very good example now: There is a European force in FYROM, and this European force took the place of a NATO force. And we discussed about having a European force also in Bosnia-Herzegovina, and—instead of a NATO force. This will be also positive for the Balkans.

I think it's a big mistake to believe that the development of a European and security policy takes place in adversity with the United States. I think that both the United States and us have an interest to have a strong defense, because a strong defense in our case will help the United States and a strong defense of the United States helps us also. And a good example again I'll bring is Afghanistan. We discussed about Afghanistan. As you know, there is—there are German soldiers in Afghanistan. There are United States soldiers in Afghanistan. We have a common policy in order to have more peace and security in Afghanistan.

And also the question that this security policy is a threat to anybody, I think it's ridiculous because we have a very clear policy in these questions. If there is a confrontation, then international law must be applied. And the United Nations Security Council has to decide on differences. As for example, Greece has always said, concerning the problem of the continental shelf, it's a—with Turkey, that the international court of justice has to decide.

So the European development in concern with defense cannot be a threat to anyone. It's, I would say, a decisive step for peace.

President Bush. Romano.

Iran's Clandestine Nuclear Weapons Activities

Q. Mr. Prodi, when you discussed Iran with President Bush, did you raise the question of what would happen if Iran does not comply to sign up to enhanced inspections?

President Prodi. We discussed deeply about Iran, but I didn't ask him what he would do, you know. I tell my opinion. [Laughter]

President Bush. Iran must comply. It's—the free world expects Iran to comply. Just leave it at that. They can—

Q. And if it doesn't?

President Bush. We expect them to. See, you're assuming they won't. We believe they will when the free world comes together.

President Prodi. I tell you that the dialog is—

President Bush. And if they don't, we'll deal with that when they don't.

President Prodi. The dialog with Iran is going on daily and deeply. And we push that they accept all the inspections, even the non—let's say, planned inspections because we have to be sure that doesn't constitute a danger to future peace. We have to be absolutely sure.

President Bush. Yes. If the world speaks together, they'll comply.

Thank you all very much for coming. We enjoyed it.

NOTE: The President's news conference began at 1:20 p.m. in the East Room at the White House. The President met with Prime Minister Konstandinos Simitis of Greece, in his capacity as President of the European Council, and President Romano Prodi of the European Commission. In his remarks, President Prodi referred to the Kyoto Protocol to the United Nations Framework Convention on Climate Change.

Joint Statement by President George W. Bush and European Council President Konstandinos Simitis and European Commission President Romano Prodi on Hydrogen Cooperation

June 25, 2003

We affirm our commitment, on behalf of the United States and the European Union, to collaborate on accelerating the development of the hydrogen economy as part of our broadening cooperation on energy. We aim to enhance the security of energy supply, increase diversity of energy sources, and improve local and global environmental quality. Our cooperation will lay the technical, legal, and commercial basis needed to accelerate the commercial penetration and trade of emissions-free hydrogen technology worldwide, in cars, buildings and power generation, to secure to our citizens and our posterity the abundant, secure, and clean energy

required to sustain growth, ensure security, and protect the environment.

In this context we see the potential of the hydrogen economy in establishing a secure energy supply through clean and environmentally sound systems. We will seek to build on complementarities in our research efforts in exploring actively all technology options, including a major focus on renewable energy sources, for boosting the development of hydrogen energy.

We agree to:

- further the goals of sustained economic growth;
- strengthen our cooperation to work for universally compatible codes, standards, and regulations;
- strengthen our cooperation on research and development; and
- work together to foster public-private collaboration.

This effort will enable us to leverage resources; bring to bear the expertise of the public and private sector to solve the complex challenges surrounding the hydrogen economy; establish sound, universally compatible codes, standards, and regulations for hydrogen fuel utilization; and provide a strong and broad foundation for the International Partnership for the Hydrogen Economy and other partnerships in support of the hydrogen economy.

Joint Statement by President George W. Bush and European Council President Konstandinos Simitis and European Commission President Romano Prodi on the Proliferation of Weapons of Mass Destruction

June 25, 2003

Proliferation of weapons of mass destruction (WMD) and their delivery systems constitutes a major threat to international peace and security. The threat is compounded by the interest of terrorists in acquiring WMD. This would undermine the foundations of international order. We pledge to use all

means available to avert WMD proliferation and the calamities that would follow.

- We will work together to strengthen the international system of treaties and regimes against the spread of WMD. This implies the development of new regimes, as appropriate, and reinforcement of existing regimes. We will pursue the goal of universal membership of relevant multilateral treaties and agreements.
- We will seek to ensure strict implementation and compliance. We are willing to work with all those who respect international nonproliferation norms; we are committed to dealing effectively with those who ignore them or cheat.
- We will support, when necessary, non-routine inspections.
- We recognize that, if necessary, other measures in accordance with international law may be needed to combat proliferation.
- We will work together to deploy our combined political and diplomatic influence most effectively in support of our nonproliferation objectives.
- We will work together to develop further a common assessment of global proliferation threats.

We welcome the statement on non-proliferation by European Union Heads of State and Government at Thessaloniki and the G8 Declaration of the Non-Proliferation of Weapons of Mass Destruction. We reaffirm our joint commitment to relevant treaties and agreements, in particular the Nuclear Nonproliferation Treaty. We will work together in all areas to stop and reverse proliferation.

In particular:

- We will explore ways to make the International Atomic Energy Agency's (IAEA) Safeguards Agreements and Additional Protocols a standard for nuclear cooperation and nonproliferation. We urge all States with nuclear facilities or activities to ratify and implement these Agreements and Protocols without delay. Furthermore, on an urgent and exceptional basis, taking account of the increase in the Agency's workload in this area, we will support an adequate
